

# Alphatag Version 11.0

## Release Notes

### Taxonomies

In this release, we have updated the taxonomies that Alphatag UK supports (as specified by HMRC as part of their e-filing requirements), to include the following:

- UK FRS 101 2018
- UK FRS 102 2018
- UK IFRS 2018
- UK Charities 2018
- UK FRS 101 2014
- UK FRS 102 2014
- UK IFRS 2014
- UK Charities 2016
- UK FRS 101 2018 (includes DPL)
- UK FRS 102 2018 (includes DPL)
- UK IFRS 2018 (includes DPL)
- UK Charities 2018 (includes DPL)
- UK FRS 101 2015 (includes DPL)
- UK FRS 102 2015 (includes DPL)
- UK IFRS (includes DPL) – 2015

### Miscellaneous system changes

- We have released a new and improved Help system that makes use of modern web technology. In time this will allow us to release new types of content natively in our Help system. Please let us know if there are any areas you would like to see additional help for.
- Fix applied to address the issue associated with dates when importing an Excel file with the 'Use 1904 date system' Excel setting applied.
- An issue has been fixed where tagged files were not validating correctly, due to the way that page breaks were being converted to iXBRL from documents that had been prepared in the latest versions of Microsoft Office.
